## DETAILED ACTION

### *Drawings*

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to because they show "5 BITS" in items 108 of Fig. 4, whereas the specification refers to 8 bits (or 1 byte) with reference to items 108 of Fig. 4 (see page 5, lines 25-27, which describes writing data "bytes" 108).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 2111

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,449,289 to Quicksall.

With regard to claim 1, Quicksall discloses a method for communicating between a master device and a slave device connected via an inter-integrated circuit bus (I2C bus); the method including the steps of: addressing the at least one slave device (Fig. 2A, item 34; column 4, lines 42-45); providing a command code to the addressed slave device (Fig. 2A, item 44; column 4, lines 55-67; and column 5, lines 6-17); interpreting a supplemental address contained in the command code (column 4, lines 55-67; column 5, lines 6-17; and column 5, lines 30-38); and, determining an internal address for the slave device using the supplemental address (column 4, lines 55-67; column 5, lines 6-17; and column 5, lines 30-38).

With regard to claims 2 and 3, Quicksall discloses the method where the slave device includes at least one internal device having an internal address; and where the interpreting step includes using the supplemental address to determine at least part of the internal address; and where the communicating is selected from the group consisting of writing data to a location within the slave device and reading data from a location within the slave device (*see generally*, column 4, lines 55-67 to column 5, lines 1-38).

Therefore, Quicksall discloses the invention as specified in claims 1-3.

***Allowable Subject Matter***

5. Claims 15-21 are allowed.
6. Claims 4-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter: The primary reason for the allowability of claims 4-14 and the allowance of claims 15-21 is the inclusion of the limitation, "at least one indicator bit indicating the format of the internal address portion of the array" as recited in independent claims 15 and 22, and as similarly recited in dependent claims 4 and 6. This limitation, in combination with the other claimed features, distinguishes the claimed methods over the prior art.
